Clinton To Veto Dollars Out Of Kentucky's Pockets

Economists have universally attested to the positive economic effects of a balanced budget. These include lower tax rates on families with children and lower interest rates on home mortgages, car loans, and student loans. Today, the President is anticipated to veto the Balanced Budget Act, a bill that would have required government to live within its means for the first time in a generation. Here is what the President's veto of this historic bill means to you.

If Clinton had signed the Balanced Budget Act . . .

. . . Americans would have saved:

- ▶ **\$2,388** a year in mortgage payments on a house with a \$75,000, 30-year mortgage.
- ▶ **\$1,026** over the life of a 4-year loan on a car worth \$15,000.
- ▶ **\$1,891** over the life of a 10-year student loan of \$11,000.
- ▶ **\$74,381** over the lives of all these loans.

[Source: DRI-McGraw Hill. The study found that interest rates could drop 2.7 percentage points — to the level of the 1950s from where they were in November 1994 when Republicans took charge of Congress.]

. . . Families with children would have received a tax credit that would have:

- ▶ Helped **28 million families** raising **51 million children** and eliminated the federal income tax bill for over **3.5 million families** raising almost **9 million children**.
- ▶ Saved families with two children **\$1,000** — enough for the average family to buy 3 months of groceries, or make **1½** mortgage payments, or pay electric bills for 11 months.

[Source: Heritage Foundation]

. . . The average citizen of Kentucky would have saved:

- ▶ **\$2,544** per year from lower mortgage payments.
- ▶ **\$296** per year from lower state taxes due to lower state and local interest payments.
- ▶ **\$566** per year from lower interest payments on a student loan.

. . . Kentucky families would have received a tax credit that would have:

- ▶ Helped over **384,000 Kentucky taxpayers** with over **674,000 dependents**. That's over **\$300 million** per year staying with these working families.
- ▶ Eliminated the federal income tax bill in our state for over **46,000 taxpayers** with over **122,000 dependents**. That's **\$27 million** per year staying with these working families.
- ▶ Paid for nearly **6 years** of tuition payments at the University of Kentucky, if the parents banked the **\$500** tax credit for 18 years. *[Source: Heritage Foundation]*

... State and local governments in Kentucky would have saved:

- ▶ **Over \$502 million** in interest payments over seven years, due to lower interest rates from a balanced budget.
- ▶ That's \$502 million available for tax relief, more schools, better roads, and more local police.

Because of Clinton's Veto of the Balanced Budget Act ...

- ▶ We can expect interest rates to increase.
 - ▶ These increases will cost the average American family \$979 more per year on their home mortgages, student loans, and car loans, and \$1,500 in future taxes to pay for the extra \$100 billion in annual interest payments on new federal debt.
- [Source: Joint Economic Committee]*
- ▶ Evidently, the President either thinks these costs are acceptable or he has a real plan to produce a real balanced budget in seven years.
 - ▶ I look forward to seeing the President's plan to produce a real balanced budget in seven years.
